To Whom It May Concern,
Please take note that as an American, I believe it is my right to support and benefit from XM programming. This new type of radio is helpful in its local content such as traffic and weather. As a paying subscriber, I strongly support XM and do not believe that any government agency should limit or control its content and programming, as long as it is lawful, legal and not abusing anyone's rights.

Thank you for your time.

Sincerely,
Mark Pruzensky
